Conducts a range of activities where policy meets the life sciences, including the environment, geography, laboratory animal use, and natural resource issues. Industrial Technology. Additionally, a number of public and private research funders have introduced policies and support systems to ensure that the results of the research they sponsor are open.

As open science by design becomes the norm, researchers will find that they be
Read more Health and Medicine Division Identifies concerns in medical research, care, and education and examines policy matters relating to health care and public health.

Proceedings: Proceedings published by the National Academies of Sciences, Engineering, and Medicine chronicle the presentations and discussions at a workshop, symposium, or other event convened by the National Academies. Chapter 8: Communication in the Life Sciences.

The domestic industrial base is critical to supporting and sustaining both
assessment activities are increasingly driven by subnational organizations—city, county, and state governments; utilities and private companies; and stakeholder groups and engaged publics—trying to better serve their constituents, customers, and members by understanding and preparing for how climate change will impact them locally.
