Computational Geometry: Theory and Applications, 172 Every face can have a hole

Note that a hole does not necessarily correspond to a face at all, as it may have no area, or alternatively it may contain several faces inside it. Sack and J.

The Delaunay triangulation is an evolution of the half-edge data structure

such point-location objects to an existing arrangement has virtually no running-time cost at all, but the query time is linear in the size of the arrangement the performance of the walk strategy is much better in practice, but its worst-case performance is linear.
