In ten brief chapters he weaves archaeology, anecdote, and the written record. Three loci deviating from HWE were likely due to the presence of null alleles in the data - Fca in Bandhavgarh, and Pati01 and F53 in the Melghat-Satpura-Tadoba cluster, as they showed significant deviation from HWE only with observed allele frequencies and not with null allele corrected frequencies not shown. Oxford University Press, New York. Ministry of Environment and Forests, Government of India. In Memoriam : J. Indian crested porcupine. Dependence on forests for focus until recently, and data on local and firewood, bamboo and other forest produce is indigenous hunting in India is very sparse high. Conservation policy need to shift the focus from protected area centered pr article: Fauna of India. Figure 5.
