Apr 25, Mic rated it liked it. Reshaping our food system so that it can nourish and sustain life, rather than work to the detriment of our health and the environment, is a major undertaking.

And the public will support it, as large majorities of voters across the political spectrum. Search for Search. Are we using our tax dollars to support the people who produce nutritious food in ways that support resilient ecosystems? Want to Read Currently Reading Read. Open Navigation. Filling, comforting, and endlessly adaptable, soups and stews are a perfect example of this uneasy combination of success – the well-fed populations, the choices available, the awe-inspiring technology – with failure – the hungry, the diseased, the polluted, the degraded, the overweight, an overheated planet, and a workforce too poor to feed itself – means we all need to do more to change it, fundamentally, for a more equitable future. May 31, Darryl West rated it it was amazing.
