Hence only way to capture the effect of the behavior at micro level on the behavior at meso level particularly in a heterogeneous material like concrete is by a multi-scale modelling. Multiscale modeling and testing -- Read more Maximumparticle size. In this paper, the material structures of cement paste, mortar, and concrete are based on particles embedded in matrix model. Unhydrated cement. The aim of this work is to show why fractal patterns in the failure process of concrete specimens under tensile loads can be seen as a consequence of the grain size distribution of the aggregates.
